FORMICA GROUP BRINGS COLOUR TO THE MIRIBILLA FITNESS CLUB

Formica Group injects colour into the Miribilla Fitness Club, a modern multi-story sports facility located in Bilbao, designed by architects Aitor Martínez and Igor Zorrakin.

The interior design of the space is accentuated with Formica® HPL laminate in an AR Plus® high gloss finish, which provides a bright orange continuous colour on the ceilings and walls. In doing so, a mirror effect is created between the ceiling and the 200 square-meter corridor of the fitness hall.

AR Plus® by Formica Group offers a range of striking colourways perfectly on trend for today's modern interiors. Offering twice the performance of traditional gloss it is highly resistant to scuffs and mar abrasions. These qualities make it the ideal choice for high traffic environments such as the fitness center. AR Plus looks good and performs well giving the specifier the confidence to create stunning interiors.
