NEW FORMICA® COLLECTION DECORS IN SWEDISH BAR

When a bar in Sweden was furnishing a new drink bar, they wanted something new and different.

Decorator Jan Carlsson was inspired by the new Formica® Collection and chose to use Mode and Rigato™ in the design of the new bar environment.

Mode is a unique pattern to Formica Group, inspired by digital pixilation. Available across 3 scales: mini, midi and maxi where Mini Mode White on Amarena and Midi Mode Folkestone on White have been used on the bar and tables.

Rigato is a new texture developed by Formica Group, in conjunction with leading designer Kristina Råström. This pioneering texture is a modern interpretation of a classic pin stripe which plays on the subtle contrast between matt and gloss finishes and provides a extra dimension to the vertical surfaces on the bar.
